### PROFILE SUMMARY

Product design leader with 9+ years building B2B SaaS and AI platforms used by over a million users across AdTech, Construction Cloud, Healthcare, AI/ops, IIoT and Bigdata. I operate at the intersection of design and product management — authoring PRDs, personas, business rules, and roadmaps, then leading the design systems and screens that ship them. Currently own design strategy and product definition across a 7-product DOOH (Digital Out-of-Home) portfolio at Moving Walls.

Recent product-defining work includes MW Activate, a programmatic DOOH DSP designed against OpenRTB 2.6 and IAB standards; MW Cinema, an inventory-management extension that converts cinema advertising into a first-class programmatic asset class; and MW PosterOps, a closed-loop OOH execution platform with no-login Magic Link portals for vendors, field installers, and clients.

I lead and mentor a team of 9+ designers and run an AI-augmented practice — Claude for research synthesis and product documentation, Figma Make and UX Pilot for rapid concept-to-prototype exploration — alongside core proficiency in Figma, Sketch, and Adobe XD.

### WORK EXPERIENCE

#### Senior Lead UX Designer · Product Designer · Moving Walls India Pvt Ltd 03/2025 – Present · Bengaluru

- Scaled the design portfolio from 3 product lines to 7 shipped DOOH products, owning the design strategy, design system, and product-definition practice that made the growth possible; lead and mentor 9+ UX designers with a shared design language, lifting usability and customer satisfaction by 25%.

#### MW Activate — Programmatic DOOH Demand-Side Platform (DSP)

- Authored the end-to-end PRD — functional requirements from planning through administration, and business rules covering pacing, forecasting, deals, impression accounting, and financials — plus 13 personas with journey maps and six core workflow architectures.
- Produced a design inventory across 8 workflow areas in 4 delivery waves; designed against OpenRTB 2.6 DOOH objects and IAB taxonomies, scoping SSP integrations with BroadSign Reach, VIOOH, Place Exchange, and LMX.

#### MW Cinema — IMS Cinema Inventory — programmatic cinema advertising

- Defined the PRD that onboards cinema as a first-class programmatic asset class: a Media Owner → Cinema → Screen → Showtime → Slot entity model, dynamic slot generation from showtimes, real-time availability and reservation engines, CPM/CPS and slot-position selling terms, and DSP programmatic-eligibility rules.
- Specified the operator experience end to end — bulk Excel/CSV onboarding, near-real-time schedule APIs, field-level tooltip and helper-text specifications, error handling, and BDD acceptance criteria.

#### MW PosterOps — Closed-loop OOH execution platform (Influence)

- Defined a closed-loop execution system covering the full static-OOH campaign lifecycle: pre-production creative validation, printer-vendor management, three-layer QC, dispatch, field installation, and Proof-of-Play approval with a client delivery portal.
- Designed a no-login Magic Link access model for vendors, installers, and clients — geo-tagged, timestamped, offline-capable execution flows — with RBAC, issue management by severity, notification engine, and payment-validation gates.

#### Platform AI Strategy

- Authored the platform-wide Hybrid UI / Agentic UI strategy and phased roadmap through 2027, presented to product leadership, engineering, and external clients.

#### Lead UI UX Designer · ConstructivIQ India Private Limited 05/2023 – 11/2024

- Designed a Construction Cloud SaaS platform from the ground up — focused on Submittals and Materials — establishing a scalable design system and a library-based front-end architecture with the engineering team.
- Developed AI-based concepts to streamline workflows and surface intelligent insights; engaged directly with customers during onboarding alongside Sales & Marketing to tune the platform to real user behaviour.

#### Sr. Lead UI UX Designer · Onx Software Systems (Slate Technologies) 11/2021 – 03/2023

- Led a team of four designers and front-end developers on Slate.ai, a construction-cloud SaaS application for the U.S. market — owning research, wireframing, prototyping, and design implementation with engineering.

- Collaborated with stakeholders and cross-functional teams to gather requirements and keep the platform aligned to industry standards.

**Team Lead — Global UI UX** · Quinnox 05/2020 – 10/2021

- Led design and research for an AIOps automation SaaS platform in the DevOps space — running sprint planning, managing the team, and coordinating with global teams in an Agile environment.

**Senior UI UX Designer** · Microland Limited 09/2018 – 01/2020

- Designed IIoT applications for Smart Factory / Industry 4.0 programs spanning Big Data, ML, AI, and IoT platforms.

**UI UX Designer — Big Data & IoT** · Knowledge Lens Pvt Ltd 06/2016 – 11/2017

- Designed Big Data and IoT product interfaces across enterprise monitoring and analytics use cases.

## KEY SKILLS

---

**Product:** Product Strategy & Vision · PRD Authoring & Functional Specs · Roadmapping & Prioritization (RICE) · Go-to-Market & Positioning · Competitive & Market Analysis · Success Metrics & KPI Definition · User Story Mapping & BDD Acceptance Criteria · Personas & Jobs-to-be-Done

**Domain (AdTech / OOH):** Programmatic DOOH · OpenRTB 2.6 & IAB Taxonomies · DSP/SSP Ecosystems & Integrations · Inventory & Yield Management · Proof-of-Play & Campaign Verification · Audience Measurement

**Design:** User Research & Analysis · Usability Testing · Information Architecture · Wireframing & Prototyping · Interaction & Visual Design · Design Systems & Style Guides · Responsive Design · Accessibility

**Leadership:** Design Management · Team Building & Mentoring · Stakeholder Engagement · Design Ops & Process · Agile/Scrum

**AI & Prototyping Tools:** Claude, Claude Code & Claude Design · Cursor · Replit · Emergent · Figma Make · UX Pilot · GitHub Copilot

**Design Tools:** Figma · Sketch · Adobe XD · Maze · UserTesting · Pape.design.

**Product & Delivery Tools:** Jira · Confluence · Miro · Intercom · Google Analytics.

## PROJECTS

---

**Moonmart (moonmart.ai)** — It's a global SaaS marketplace platform. Built the complete brand identity and design system — logo system, color tokens, typography scale, and dark-themed visual language — and defined the product vision, positioning, and early go-to-market and traction strategy.

**Lokul.club** — Founder-led concept for a hyperlocal neighborhood commerce platform for India — making the neighborhood economy visible, trusted, and transactable for residents, informal workers, and local merchants. Defined the product vision, brand identity, positioning (“Own Your Neighborhood”), and go-to-market narrative, including bilingual (English/Hindi & all the regional languages in India) messaging for Tier 2/3 markets.

**Flexbuild.io** — Spearheaded adoption of Flexbuild, a LowCode/NoCode platform, enabling designers and developers to ship 80% faster from concept to delivery.

**FlexEHR Healthcare Solutions** — SaaS electronic health record platform for multiple medical specialties — patient management, scheduling, and billing integration. [flexehr.in](https://flexehr.in)

## EDUCATION & CERTIFICATION

---

**MBA/PGDM — Information Technology**, Caralox Teachers University, 2016 · Grade 76%

**BCA — Computers**, Caralox Teachers University, 2014 · Grade 70%

**Certification:** Human Factor Interaction

**Languages:** English · Hindi · Marathi · Kannada
