Profile Summary

Lead Product Designer with 9+ years of experience designing B2B digital and AI platforms that have impacted over a million users across web, mobile, and software solutions. I specialize in user research, usability testing, and crafting intuitive designs that solve real-world problems and drive measurable value. I've designed and shipped a global web marketplace and a healthcare platform, integrating advanced AI capabilities like intelligent chatbots to elevate user interaction and productivity. Across the Construction Cloud and AIOps domains, I've applied Generative AI to streamline workflows and empower users with smarter, automated solutions.

I bring a modern, AI-augmented design practice—leveraging tools like Claude for research synthesis, ideation, and rapid content generation; Figma Make for turning concepts into working prototypes; and UX Pilot for accelerating wireframing and design exploration—alongside core proficiency in Figma, Sketch, and Adobe XD. With hands-on experience mentoring junior designers and collaborating with cross-functional teams, I bring a well-rounded approach to building innovative, impactful products, backed by a portfolio that highlights strong problem-solving and a robust, end-to-end design process.

Work Experience

Senior Lead UX Designer, Movingwalls India Pvt Ltd	03/2025 – Present Bengaluru
• Scaled the design portfolio from 3 product lines to 9 shipped products across the DOOH (Digital Out-of-Home) domain, driving the design strategy and system that made that growth possible • Lead the end-to-end UX process across web, mobile, and platform products, lifting usability and customer satisfaction by 25% • Mentor and guide a team of 13+ UX designers, establishing a shared design language that improved quality and consistency across a fast-growing product portfolio • Partner with product managers, engineers, and stakeholders to align UX with business objectives, accelerating delivery and reducing design-to-build rework	
Lead UI UX Designer, ConstructivIQ India Private Limited	05/2023 – 11/2024
• At ConstructivIQ, I contributed to building a Construction Cloud SaaS platform, primarily focusing on Submittals and Materials. • I designed the product from the ground up, established a scalable design system, and collaborated with front-end developers to implement a library-based architecture, ensuring a lightweight and efficient application. • Additionally, I developed AI-based concepts to enhance user experiences by streamlining workflows and providing intelligent insights. • I worked closely with stakeholders and the Sales & Marketing teams and engaged directly with customers during onboarding to understand user behaviour, optimize the platform, and deliver impactful solutions tailored to their needs.	

Sr. Lead UI UX Designer, Onx Software Systems (Slate Technologies) - Led a team of four, including frontend developers and designers, to design Slate.ai, a leading construction cloud SaaS application for the U.S. construction industry. - Responsibilities included user research, wireframing, creating mockups, and prototyping. - Worked closely with developers for accurate design implementation, collaborated with stakeholders to gather requirements, and engaged cross-functional teams to ensure the platform met industry standards.	04/2021 – 03/2023
Team Lead Global UI UX, Quinnox - Involved in the design and research for DevOps and AIOps products, where I contributed to building an AIOps automation SaaS platform. - My responsibilities included leading sprint planning, managing the team, and coordinating with global teams to maintain alignment and ensure smooth project progression. - I collaborated closely with cross-functional teams to drive design quality, enhance user experience, and support product objectives within an Agile environment.	03/2020 – 10/2021
Senior UI UX Designer, Microland Limited Worked on IIoT Projects which are in Smart Factory/Industry, Having experience of Bigdata, ML, AI, and IoT Application UI UX Design.	09/2018 – 01/2020
Sr. UI UX Designer Bigdata and IoT, Knowledge Lens Pvt Ltd	06/2016 – 11/2017
